Barron's NEW SAT Flash Cards, 3rd Edition: 500 Flash Cards To Help You Achieve A Higher Score

Synopsis

Practice and review questions for all sections of the new 2016 SAT are presented on this set of 500 revised and updated flash cards. The math cards include 75 important math facts and 25 valuable strategies that students need to know in order to answer SAT math questions successfully, as well as 100 sample SAT problems in multiple formats. The grammar cards present multiple-choice questions in proper sentence construction. The vocabulary cards present two words per card with definitions on the reverse side--a total of 200 new words for test takers to learn. These boxed cards are designed with a punch hole in one corner. The hole can accommodate an enclosed metal key-ring-style card holder that students can use to customize study on the go.

Book Information

Cards: 504 pages

Publisher: Barron's Educational Series; 3 edition (April 1, 2016)

Customer Reviews

I'm a Harvard grad, SAT perfect scorer and full-time tutor who has taught the SAT for nearly 20 years. I think we can all agree that notecards are great study tools, and are often more practical and easy-to-use than are books, which is why I was excited to buy and review this product. I give these flashcards my recommendation because of their convenience, low price, and helpful system of organization. However, I would caution against simply "studying" these cards: passively reading them is not the best form of learning. Instead, write anything down that is unfamiliar. We fail to take advantage of tactile learning when we use pre-printed notecards, which is why making your own notecards is an even better option. As you can see from the picture, the flashcards include convenient red tabs on the top that help you keep them organized in the box by topic. The 500

flashcards are divided as follows:1) 100 Vocabulary cards featuring context clues (two words on each flashcard--one on bottom (grey tabs) and the other on top (red tabs))2) 200 Grammar and Writing cards3) 90 Math Fact cards4) 20 Math Strategy cards5) 70 Multiple-Choice Math questions6) 20 Grid-In Math questionsIn addition, it is worth noting that these cards are designed for the average test-taker, not SAT high scorers (1200 and above). Many of the flashcards are very basic and feature questions like "What is an integer?" and "How many degrees are in a straight line?". While these concepts are of course essential to the New SAT, most high school students are already well aware of these basic mathematical facts, and might need something more challenging. But for someone just starting to get familiar with the basics of this test, these flashcards from Barron's will provide a solid introduction.Right now these cards are selling for \$9, which is a steal. Barron's is quickly becoming my go-to recommendation for affordable, competent test-prep books and flashcards.However, don't forget to also purchase the Official Guide to the SAT (or download the free PDF equivalent from the College Board website), which is the only source of real test questions for the SAT. You are also welcome to read my detailed review of the book, which is currently the top review on :Â Official SAT Study Guide (2016 Edition) (Official Study Guide for the New Sat)For more information, including my personal, frequently updated recommendations for SAT prep, google "SAT Action Plan - McElroy Tutoring."

My daughter has been studying for the New SAT. While she is also working online and with an SAT prep book, she is using these flashcards as a supplement and finding them very helpful. (I would not recommend using ONLY the flashcards for preparation Ã¢ÂÂ they are best of the supplement.)If, like mine, your student learns well from flashcards, this is an excellent set for New SAT preparation.I hope this helps with your decision. Best of luck to your student!

The cards are great, however, I realized as I studied with my son that the phonetic spelling was missing from each card. What's the use of learning cool words that are improperly pronounced. A good focus group may have caught this minor error. Otherwise, the cards are useful.

More effective study mode for some students==especially as test day approaches. Allows you to mix as you please. Each card is marked by subject and placement/number, so you can easily mix and then restore original order.

An excellent tool that complements the Barron's New SAT text.I would have given 5 stars, but you

have to sync the cards with the book on your own. It would be helpful if they provided that.

The explanations were very thorough. Great tips. We especially liked the writing rules section

These are really great. I liked the quality and the content as well. It has vocabulary and extra questions in grammar and math. I would definitely recommend it.

The cards came quickly. They were neat and nicely organized. I've practiced with the cards and they are great!
