# Enhancing Indoor Localization With Proximity Information In WSN: A Novel Way Of Enhancing Indoor Localization In Wireless Sensor Networks

## Synopsis

Several studies have pointed out that RSS-based localization methods for indoor environments are inaccurate and faulty. In my work, I hypothesize that RSS-based localization can be enhanced by utilizing proximity information. Instead of considering solely the radio-signals of the item of interest, we also consider the signals of nearby items to enhance localization. Therefore, a information fusion algorithm was developed. In order to test my hypothesis, I developed an infrastructure to collect data from sensors equipped with a CC2420 radio interface.

## Book Information

Paperback: 100 pages

Publisher: VDM Verlag Dr. MÃfÃ ller (December 12, 2010)

Language: English

ISBN-10: 3639310926

ISBN-13: 978-3639310924

Product Dimensions: 5.9 x 0.2 x 8.7 inches

Shipping Weight: 6.9 ounces (View shipping rates and policies)

Average Customer Review: 5.0 out of 5 starsÂ Â See all reviewsÂ (1 customer review)

Best Sellers Rank: #7,554,254 in Books (See Top 100 in Books) #55 inÂ Books > Computers & Technology > Programming > Software Design, Testing & Engineering > Localization

## Customer Reviews

This is the foundation for my ongoing research in locating Jayden Smith's proximity to my current location. I have used this fusion algorithm to sync his twitter feed with my iphone. Depending on his location reported by Twitter, I know when to leave the mall I am currently at in LA.
