Customer Reviews

This is a revision of the award winning classic, Vegetarian Cooking for Everyone. It is well worth buying, even if you own the original version. I have been cooking recipes from the original since before it was published, having been lucky to take a class from Madison when she was working on it. All of the original recipes are here, but there are also 200 new ones, making the total 1,600. The recipes have been completely reformatted; now they are in a 2 column per page format, and are

actually easier to read than in the original, but there are fewer pages! a total of 665. The drawings and photos have been dropped, likely since the publisher has changed to 10 Speed press. However, since only a few of the recipes had photos to begin with, the book does not suffer from it. We used the 10th anniversary Edition of this book as one of the texts in the all vegetarian cooking school I graduated from. It is now better than ever, with the addition of a comprehensive discussion of vegetarian ingredients, such as sweeteners, vinegar, herbs, and edible flowers. Recipes that can be made Vegan are now clearly marked with a big V in a circle. But truly what sets this cookbook apart from the rest, besides how encyclopedic it is, is the quality of the recipes. Everything I have made from here over the past 17 years has been outstanding. The sort of recipes that everyone loves, even non-vegetarians. There is fresh pasta, Asian noodles, the fabulous Galettes, stir fries, soups, salads, desserts, dumplings, omelettes, and of course vegetable sides, beans, and grains. And of course much more! The relishes and sauces look terrific! Here are some of my favorite recipes, and some I must try:

Appetizers: Roasted Cashews with Garam Masala, Roasted Eggplant with Dill, Yogurt, and Walnuts, Black Bean and Smoked Chile Dip, Artichoke Pesto, Roasted Potatoes with Chile Mayonnaise, Crispy Roasted Chickpeas with Spice and Smoke

By way of background, I am an experienced - albeit not a gourmet - cook, with a wish to have more vegetarian options in my repertoire. This is the best cookbook that I've ever used, and comparable to the Joy of Cooking is its range and everyday utility. I believe that people's mileage does vary widely in using cookbooks. In my case, I've bought a number of Mark Bittman's books, because I love his philosophy, and like his meal planning and modular approach to cooking. I really appreciate the underlying thinking that cooking should be less recipe driven and more of a flexible approach to what's in your kitchen, or fresh and seasonal. That said, I've found many of the recipes that I've tried to be very pedestrian in flavor - they taste like they were created by health conscious folks in the 70's. Other recipes have had seasoning that is so pronounced that the end result is inedible (3 Tablespoons of cumin? Really??? Was that a typo?), had major timing issues, or required ingredients that I generally don't have. However, other people do love using his cookbooks, so YMMV.What I've liked about the Deborah Madison cookbook : 1. every single recipe has turned out from "very good" to "Wow!..awesome!" 2. From my relatively well stocked larder, I can almost always find the ingredients 'in house' There are plenty of recipes to address cooking the staple vegetables and proteins (tofu, etc.) that are common to have. Equivalents/ substitutions are noted, and multiple uses for many recipes are also mentioned. Somehow, it's been much more successful in prompting me to cook with a modular, flexible approach - something I'd really wanted from the Bittman books, but not actually achieved. 3. It's changed my approach to vegetables, from treating them as an afterthought - the "just saute or microwave a bunch of broccoli" school of thought to using sauces that make vegetables a true pleasure to eat. 4. Clear, clear, crystal clear instructions. I can now prepare a golden, crusted tofu that is a huge improvement over my previous efforts.5. Pretty comprehensive - the joy of an all-purpose cook book.If you're unsure about purchasing, try out a few recipes first. Then, you will buy the book.

Only one member of our family is a true vegetarian, but the original edition of Madison's book is

arguably my most prized cookbook, and the one that gets the most use in our house. This update is wonderful. Madison has added quite a bit to the original. I have yet to try most of the new recipes, but I will do my best to cook my way through them. I have given this book to many people over the years as a gift, and I will continue to do so. Bravo, Deborah Madison, and thank you!
