This is the best crock-pot recipe book ever. The recipes are incredibly simple with ingredients I actually have around my house. The cooking times are almost exactly on point. And so far, everything I have tried from it is delicious. Plus, the book is well-organized with lots of pictures of the recipes. Almost every recipe has a picture accompanying it. Furthermore, it covers every category of food from appetizer to main course to dessert to beverages. With 350 recipes, my family will be trying a different one almost every night for a year. I like it so much in fact that I am also getting a copy for my mom, my sister and my boyfriend.

just wish i had order this first before i bought the other slow cooker cook books for me its fantastic.. could have saved the expense of the other two books order previously

Beautiful book with many exceptional recipes. I've already used it twice and plan to make more! The only thing that might make this recipe book better is spiral binding but the book does lay fairly flat -

with a little help it lays flat. Recommended. Thank you.

I received this Crock-Pot cookbook today and must say I was very impressed. I spent about 20 minutes looking over some of the recipes, and am even making a pot roast recipe today. I highly recommend this book to anyone interested in putting together a great meal with a minimum of fuss, and no need to slave over a hot stove to do so. The best part is the ingredients are either in your pantry right now, or easily found at your local grocery store. BONUS: The desserts look great!

I got excited when I opened this cook book up and seen all the delicious meals in it I am gonna try, I seen a really good one I am gonna make tonight before I go to bed, they are easy recipes in the cook book to make, easy to follow directions.

Really nice recipe book for slow cooker. I bought two of these - one for my sister and one for my niece. They love the book and have tried several of the recipes

I SO wanted to love this!! Ugh I wish there were a way to preview the recipes contained in this. I'll probably only make about three or four of them, unfortunately. I also wish there was more variety. It's written and detailed well, and it has helpful tips in the beginning (the only reason I'm keeping it). Could I give this one star? Yes, but it wouldn't be fair simply because the vast majority of the dishes aren't my taste, same with the rest of my family. A lot of it just isn't appetizing at all. It's all very cliché "potluck" recipes, the types that nobody ever really eats.

I really enjoy this book. I go through and make my grocery list from the recipes and am ready for dinner without turning my stove on in these > 100 degree days. Love it.
