Nourishing Noodles is one of the best cookbooks I've seen for inspiring people to use veggie noodles in new ways and try new flavor profiles. I bought a spiralizer two years ago and I am always looking for new ways to enjoy veggie noodles. Chris Anca's vegan recipes definitely offer new ways

of using spiralized noodles in their raw form. Only two recipes seem to require a dehydrator (including the delicious looking cheesy quinoa balls), and that could easily be adapted to a home oven. The cookbook is split into sections by meal type, including one section devoted to hand rolls. A large majority of the recipes are Asian-influenced, relying on ingredients like coconut milk, tamari, miso, and spring onions. There are also a few Middle Eastern-flavored recipes calling for hummus or tahini and two token zucchini-with-marinara recipes (one raw and one cooked). I found the flavor combinations to be a little odd but good in the two recipes I've tried so far, which were the lemony noodles with tahini cream sauce and the beet noodles with miso and goji berries. Chris' recipes pack a ton of flavor into her veggie noodles and it's easy to omit or cut down on a seasoning or two and still wind up with a great dish (as I did with the garlic and mint in the tahini noodles). Her recipes are written with very concise instructions. In most cases, they basically say: combine all the dressing ingredients in a blender and blend, then pour over your spiralized noodles. The front section has more detail on how to spiralize a particular vegetable or fruit. In some cases, more description would probably be helpful, for instance specifying that you should wait for the quinoa to cool before adding it to your beet salad.

Nourishing Noodles serves up inventive, easy new recipes to build healthy vegetables and fruits into any meal plan. Chris Anca's™ vegan recipes cut new ground, showcasing the art of spiralizing, often zucchini, though many more vegetables and fruits as well, in new and healthy ways. I have a spiralizer, but up until now have only played with zucchini. Chris offers a myriad of recipes for zucchini, including raw, sautéed and blanched, dishes like "Raw Zucchini Marinara" and "Beet, Zucchini and Apple Noodle Salad" but she also shows us how to use that spiralizer with turnips, cucumbers, apples and more. She even has spiralizing dessert recipes, think "Coconut Cinnamon Carrot Cakes" and "Pear Noodles with Chocolate Sauce." The same creativity she brings to her well-known blog I see here in spades. The cookbook itself is organized by meal, with a spiralizing how-to, as well as a useful healthy eating definitions section, a section of basic condiments recipes such as for nut butters, homemade ketchup and even a vegan coconut "bacon", and lastly an ingredient index. The recipes themselves are cleanly laid out, lots of white space, compelling images, clear helpful instructions, and while the ingredient lists are not short, they also are not overly complex. Anyone pursuing a healthy diet these days will have most ingredients in stock, and if not, be encouraged to go on an educating hunt. The only addition I would recommend here is that unusual ingredients be marked if optional, and substitutions be suggested.
